

IntelliQuote for Windows

“The **Intelligent** way to Quote”

Thank you for expressing an interest in our revolutionary cost estimating software.

DCM Consulting has introduced a comprehensive, features-based cost estimating program for use on Handheld or Palm-size computers running Windows for Pocket PC and Desktop or Laptop systems running Windows® 95/98/NT/2000/XP. No matter what your field of work, if your business requires the creation of accurate cost estimates you will love IntelliQuote. Although originally developed with the metal fabrication industry in mind, you may define any number of custom operations that may be unique to your business. So whether you are a contractor, flower shop owner, or baker you may tailor IntelliQuote to your methods of doing business.

Users can easily add any new process to the program's database and quickly create custom 'wizards' and help files to prompt you through all of the important features of the item or job you are quoting. Pull-down lists of standard labor operations, purchased parts, customers, and other variables greatly speedup the quoting process. Once finished, IntelliQuote automatically generates various reports including a quote that can be faxed directly to the customer from the program. Quotes can be saved and edited

Using IntelliQuote with your Pocket computer you can sit back in your chair and with one hand create detailed, accurate cost estimates using a very user-friendly program. The desktop version includes some additional functions not available for Windows CE devices, however the two are completely compatible with each other.

For more detailed product information, or to download a free trial version of IntelliQuote, please visit our website located at: www.dcmsoftware.com.

IntelliQuote version 3 Fact Sheet

Main Features:

- “Wizards” allow you to quote features to create precise quotes with less mental effort.
- Quotes can be saved and edited.
- IntelliQuote maintains a database of all quotes.
- Quote up to 5 different quantities of parts.
- Create database of operations, materials, customers.
- Include notes with each operation and material.
- Quote, Estimate, and Work-Order reports are automatically created.
- Quotes and related files are interchangeable between CE version and 95/98 version.
- The Windows 95/98 version includes a built-in report editor also allowing you to print and fax quotes directly from within IntelliQuote.

Actual view of main quoting form.

Windows® 98/NT system requirements:

- 4 MB of available program memory.
- 10 Mb of disk space.
- CD-Rom drive to install software.

Windows® CE Supported devices:

(Minimum of 6 Mb of memory available for program and storage. You must install the program to your CE device from your desktop system.)

Palm-size PCs:

Running Windows® CE version 2.11 or later.

Handheld PCs:

Running Windows® CE version 2.0 or later.

Hand-held Pro PCs:

Running Windows® CE version 2.10 or later.

Note: Since there are a wide variety of CE devices using different processors, we cannot guarantee complete compatibility with your device. We recommend that you initially install the free trial version. If it works fine on your CE device, then the full version will also work fine.
